

# Pendle Hill High School Upgrade Pendle Hill

Connecting growing school communities with state of the art, purpose built facilities and fostering diverse learning environments.

The project involves construction of two new three-storey buildings under a connected roof containing a library, lecture theatre, 14 new modern learning areas, senior student learning facilities, a multi media centre, administration space and staff and student amenities. The existing school administration facilities will be refurbished to deliver a new innovative staff collaboration and development space and four new prototype learning areas. The project also includes upgrades to the carpark and pedestrian infrastructure around the site.

School Infrastructure NSW anticipates the new facilities will be operational for term one 2023. Taylor is ensuring early and ongoing collaboration with our consultants, contractors, the School and SINSW to achieve this target.

## Project Details

Location: Pendle Hill, NSW

Client: School Infrastructure NSW
