Hi Terrence,

Thank you for providing me with the below information. Can you please confirm if the SSD application is already with DPE? If so, we will have to wait for DPE to inform us about it and we will review the project during the exhibition period, and our engineer can be briefed about the project during that period as well. However, if the proposal has not been submitted to DPE, a pre-lodgement meeting should be organised with us now and we can have a discussion about the project then.

Please let me know.

Regards,

**Bertha Gunawan**

**Subject:** Project Echidna - 10 Eastern Creek Drive, Eastern Creek NSW Lot 4001 DP 1243178 - stormwater design consultation with council

Hi Bertha,

Thank you for the call earlier.

Would Blacktown Council be available to have a meeting with us to introduce the stormwater design of the Echidna development, please?

This meeting is to help bring Council into the development's State Significant Development (SSD) process.

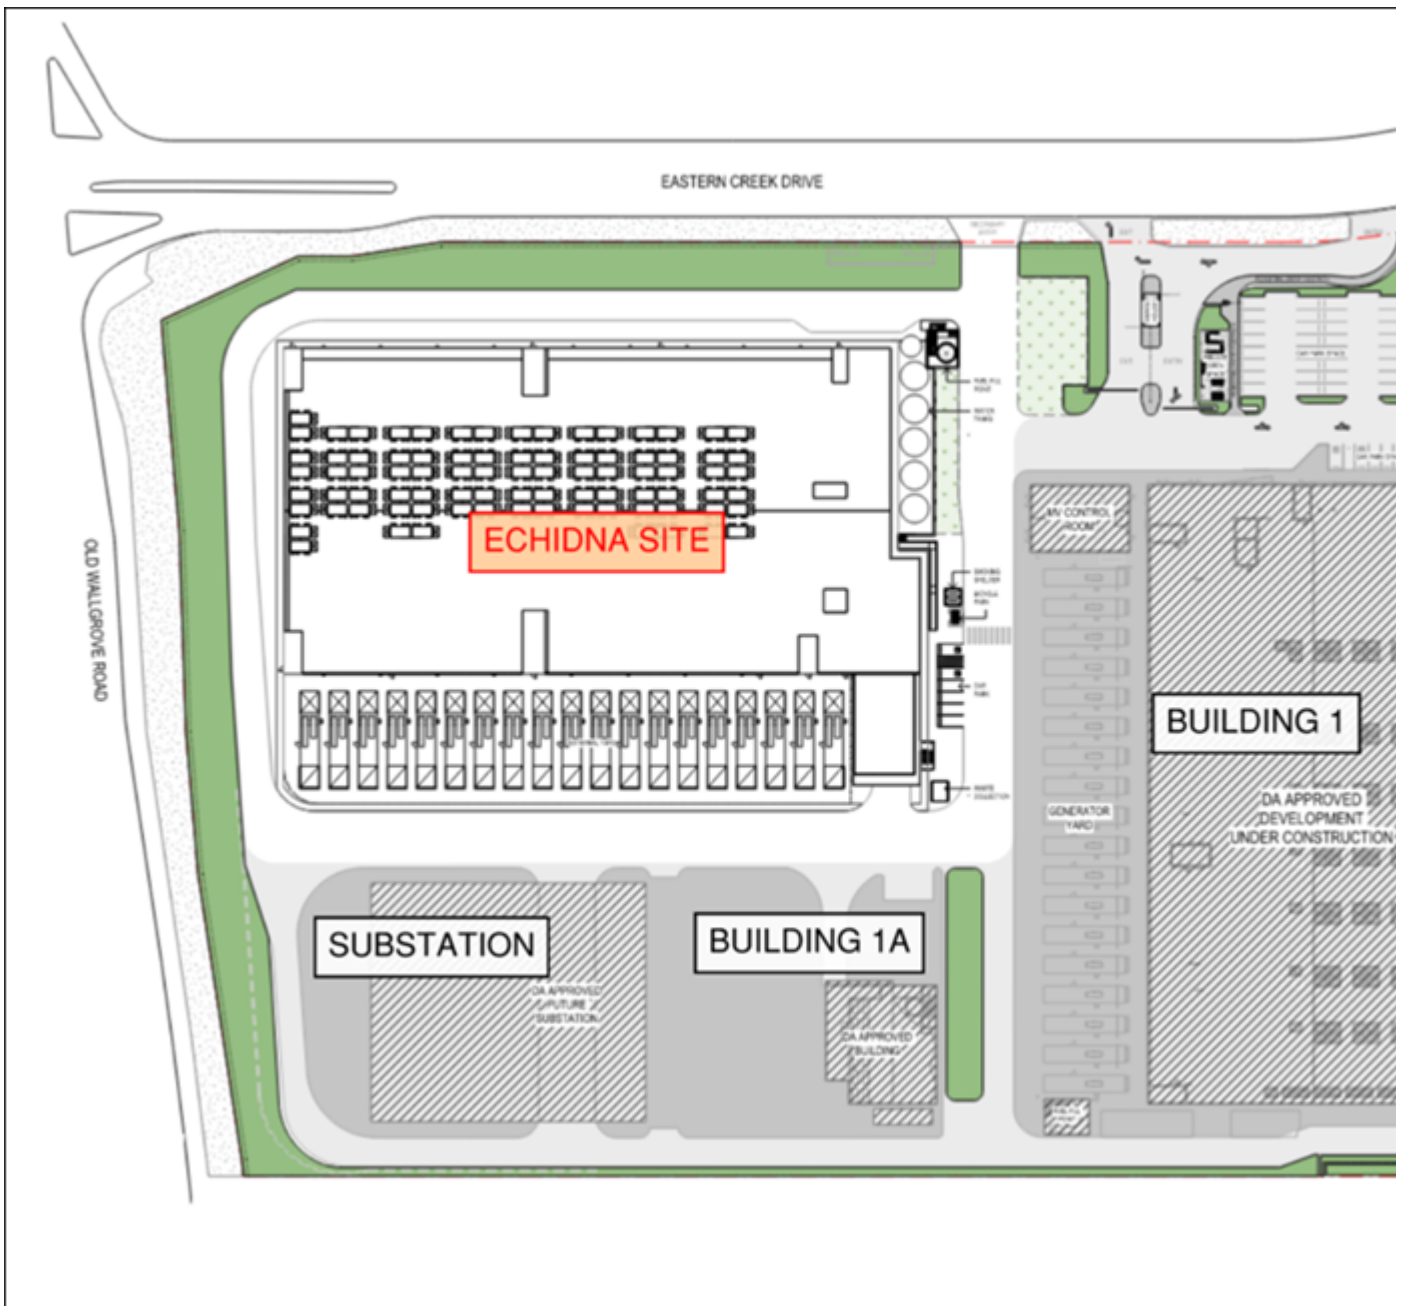

Please refer to below list for a summary of the project to help clarify the Echidna project:

- Please refer to IMAGE 1 below for the site location For Echidna. The site is located at 10 Eastern Creek Drive, Eastern Creek NSW, legally described as Lot 4001, DP 1243178.
- Echidna was previously captured in DA which included the whole precinct (including Building 1, 1A and Substation) during the concept design stage. But now the precinct has been split up between the different sites and Echidna is now on it's own detailed design development pathway as an SSD, which is why this site may not have a DA number under Blacktown Council.
- The SSDA page for Echidna can be found in the link below. Please note it has not gone for exhibition yet.
  - [Project Echidna Data Centre Eastern Creek | Planning Portal - Department of Planning and Environment \(nsw.gov.au\)](#)

Thank you and we look forward to hearing from you.

Thank you,  
Terrence
